

Focuslight Corporate Overview

© Focuslight Technologies Inc.

2026-03

Focuslight Overview

- Founded in 2007 by Dr. Victor X. Liu, headquartered in Xi'an, China.
- A fast-growing company that develops and manufactures:
 - **Laser sources and materials** (Photon Generation)
 - **Micro-optics** (Photon Control)
 - **Photonics module and system solutions** (Application Solutions) focusing on optical communication, consumer electronics, pan-semiconductor, automotive, and medical and health applications.
- A **global photonics foundry** offering process development and manufacturing services to the global photonics community.
- Publicly listed in the Shanghai Stock Exchange (Ticker Symbol: 688167).

Milestones

2007

Founding of Focuslight

2018

Dongguan delivery and high-volume manufacturing center officially in operation

LIMO

Lissotschenko Mikrooptik

2017

Acquisition of LIMO;
Started providing photon control and photonics application solutions

IPO

2021

Successful IPO at Shanghai Stock Market

FOCUSLIGHT
Never stop exploring

2019

Global branding identity upgrade

HEPTAGON

2024

Acquisition of ams OSRAM's optical component assets;
Relaunch of Heptagon brand

SUSS MicroOptics

2024

Acquisition of SUSS MicroOptics

2024

Shaoguan Base officially in operation

2025

Hefei Base officially in operation

BRIGHTVIEW
TECHNOLOGIES

2026

Announced strategic partnership with BrightView

Focuslight Corporate and Subsidiaries

Focuslight Global Operations System

Industry Leader + Strong Financial Backing + Healthy Stable Company + Invest in the Future

Do what we do best

Offer the best value

Optimize to the extreme

Achieve the best performance / quality-to-price ratio

Commitment to Customers

- Lowest cost manufacturing for high volume products
- Willing to take technical risk, but request customer commit market share in return
- Willing to take investment risk in R&D and capital including M&A for customer but request customer commit market share in return
- Collaboration transparency, fast response, IP protection and long-term partnership

What we don't do

Take high market risk

Be greedy

Be too aggressive

Compete against our customers

Vision

To unlock the potential of photonics to enhance and enrich people's life

Mission

Be the global trusted photonics solution provider through innovation, operational excellence and fast response

Products and Services

Micro-Optics

Single Lenses and Linear Lens Arrays

FAC

SAC

SAC array

BTS

Fiber coupler and collimator

Collimating DOE

Area Lens Arrays

Homogenizer and diffuser

DOE beam splitter, dot or line generator

Shack-Hartmann array

Pinhole array

Plano Optics and Coatings

Micro prism

VCSEL Line Transmitter
1000W

Beam Shaping Optics

Fast Axis Collimators, Diffusers, Homogenizers,
Collimators and Arrays in Glass, Polymer and Silicon

Global Photonics Foundry Services

From Concept to Mass Production

Core Competence

Diode Laser

Eutectic Bonding

Significantly enhances thermal conductivity, reducing thermal stress, and thus improving the products' performance and lifetime

Thermal Management

Effectively improves the ability of heat dissipation to ensure a higher output power

Thermal Stress Control

Lowers and homogenizes the thermal stress, and improve the device performance

Interface Materials and Surface Engineering

Greatly improves wettability and bonding strength of packaging materials, enhancing long-term reliability

Core Competence

Beam Shaping – *The Right Photon at the Right Place and Time!*

Micro Optics Design and Simulation

Acyindrical free-form micro-optics / arrays / diffusers / DOE splitters / beam shaping systems

Homogenization

Uniform and homogeneous illumination in any desired shape

Beam Transformation

Asymmetrical → Symmetrical beam

Symmetrical beam → High density line beam

Our UV-L750 System for Laser Lift-Off (LLO) was Prism Awards winner in 2018

Core Competence

Optics Manufacturing

Wafer Level Simultaneous Structuring	Wafer Level Photolithography-RIE (reactive ion etching)	Wafer-Level Optics (WLO) Precision Imprinting	Wafer-Level Stacking (WLS)	Precision Glass Molding	Cold Processing	Roll to Roll
 	 	 	 	 	 	 
<p>With inorganic materials: Glass, Fused Silica, Silicon, CaF₂</p>		<p>With polymer on glass</p>		<p>With moldable Glass</p>	<p>With inorganic materials</p>	<p>From PET to PC to PMMA</p>
<p>High LIDT Optical Coating: Anti-reflection, high-reflection, beam splitter, band filter, and various customization (UV, VIS, IR)</p>						

Core Competence

Test, Analysis and Diagnosis

Test and Characterization of High-Power Diode Laser

A comprehensive physical diagnostic model allows full characterization of a set of key parameters, such as:

- LIV
- Spectrum
- Polarization
- Far-field / Near-field
- Spatial spectrum
- Spatial polarization
- Spatial beam profile
- Smile effect
- Lifetime

Metrology and Analysis of Optical Components

Wave optics models are used in conjunction with tactile surface measurements for precise analysis of optical functions such as:

- Focusing
- Collimation quality
- Beam uniformity

Core Competence

High Precision Optical Assembling Process and In-house Equipment: From Components to Subsystems

A Unified Quality Management System

Governance Framework That Drives Enterprise-Wide Quality Excellence

ISO9001 Certified Quality Management System (QMS)

ISO14001 Certified Environmental Management System (EMS)

IATF16949 Certified Automotive Quality Management System

ISO45001 Certified Occupational Health and Safety Management System

Failure Mode and Effect Analysis (FMEA)

Statistical Process Control (SPC)

Production Traceability Database

Control Plan (CP)

Quality Assurance System

Ensuring Product Reliability Through Rigorous Controls and Verification

Promotion of Consistent Quality Assurance Activities

Focuslight Manufacturing System (FLMS)

Building Stable, Efficient, and Scalable Production Capabilities

To Build the Focuslight Global Manufacturing System

Zero Accidents

Zero Defects

100% Value Added

100% Delivery

Local Manufacturing Ops

QCD-focused

- Collaboration within sites
- Limited cross-site / cross-BU collaboration

Global Manufacturing Ops

VSM improvement-focused

- End-to-end value stream integration
- Building an efficient global manufacturing system

Digital Manufacturing Ops

Data-driven decisions

- Big data based cost modeling & decision support
- Global MES: automated data collection & analysis
- Predictive metrics, early warning, fast response

Smart Manufacturing Ops

Self-optimizing manufacturing system

- Replicable lean capabilities
- System evolution & self-healing
- Lean system scaling with new business growth
- Autonomous decision-making, healing, and response

Strategy Execution

Fast Response

Manufacturing Capabilities

BRIGHTVIEW
TECHNOLOGIES

FOCUSLIGHT
Never stop exploring

Micro-Optics: Roll to Roll

AI Software Design

Multi-function, complex designs that can combine spatially variable shapes, structures, and densities in a single device creating a near infinite design space

Mastering

The software transfers the design to BrightView's custom **large format (4'x8')** grayscale photolithography digital tooling system

Each pixel is "written" individually

Full size master can be written in under 24 hours

Tooling

Exceptionally consistent, low cost, high fidelity, large format consumable tooling is created from the master (or a 3rd party master)

Mass Production

A high-volume, continuous, roll-to-roll clean room manufacture of products on a variety of substrates from PET to PC to PMMA in a range of thicknesses using in-house formulated resin options

Typical Applications

Optical Communication

- High precision micro-optics are at the heart of optical communication systems.
- They support efficient data transfer between key optical components.

Typical Applications

Consumer Electronics

Optical Sensing, Empowering AR/VR and AI to See

Multi-aperture wafer-level optical lens for AR-Light Engine

Micro-optics Modules for Vis & NiR solutions with multiple FoV options

Wafer level stacking that is fully reflowable and thus mass manufacturable

Leading thermal performance, ensuring simple thermal design

Face recognition, under-display face recognition

Complex micro dot projectors optics

Multi-Zone 3D sensor solutions, including dToF, Proximity sensor optics

Leading thermal performance, ensuring simple thermal design

Typical Applications

Semiconductor

- Beam homogenization technology powers the illumination system – key optical component in **pan-semiconductor systems**
- > 15 years supply to the major manufacturer of semiconductor lithography tools

- Laser system solutions with high power density and different beam profiles, designed for various **laser-based wafer annealing processes** including IGBT backside annealing and SiC annealing

- Based on 976nm diode laser with adjustable beam output and >95% homogenization in energy distribution
- Ideal for **advanced chip packaging processes**, e.g. laser-assisted bonding

- Off-axis beam shaping technology powers laser surface treatment as well as surface inspection
- Typically used in **solar cell industry**

Typical Applications

Display Manufacturing

Solid-State Laser Lift-Off (LLO) for Flexible Displays

- Several tens of beam shapers (plasma display pixel structuring)
- Several green 100 mm line beam systems (laser lift-off)
- > 600 mm UV line beam production system (laser lift-off)

Next-gen LTPS Solid-state Laser Annealing Process

Mini and Micro LED Processing

- Laser Mass Transfer and Laser Mass Soldering
- Laser Chip Repair

Typical Applications

Automotive

LiDAR

Driver Monitoring System

Smart Headlight

Projected Lighting

AR HUD

Optical Components
and Assemblies

Laser Transmitter /
Illumination Modules

*Focuslight does not
produce LiDAR /
Lighting full system*

Typical Applications

Medical and Health

Hair Removal

Body Sculpting

Skin Rejuvenation

Ophthalmology

3D Interoral
Scanning

Dermatology

Application Handpiece

Contract Manufacturing
Services

*Focuslight does not
produce medical or
health equipment*

Typical Applications

Industrial

- **AuSn pre-deposited ceramic substrates** – stable and reliable thanks to the high thermal conductivity and suitable thermal expansion coefficient;
- **Fast axis collimators (FAC)** – fundamental and efficient solutions for shaping the beam emitted by the pumping sources;
- **Focusing lenses** – coupling the collimated laser beam precisely into the output fiber;

BRIGHTVIEW
TECHNOLOGIES

FOCUSLIGHT
Never stop exploring

Advanced Display

Advanced displays must support **power hungry AI/video processors** while providing **high brightness, superb color rendering, and excellent image rendering.**

Challenges and Demands

- Use a passive mechanism to increase brightness
- Cost effective for consumers
- Increase display performance (color, uniformity, resolution)
- Thin, flexible, lightweight for portability
- Withstand range of environmental conditions
- Improve sustainability with thin, multi-function films

BrightView Computational Optics solutions

- **Display Enhancement Films:** Demonstrated up to 40% increase in brightness translating to 60-120 minutes of additional battery life
- **Zonal Films:** Gradient of micro lenses to correct color non-uniformity while maintaining brightness and HDR

Typical Applications

Lighting

BRIGHTVIEW
TECHNOLOGIES

FOCUSLIGHT
Never stop exploring

Indoor Commercial

Indoor Architectural

Outdoor Architectural

BrightView engineered **diffusers** and **microlens arrays** enhance lighting performance by improving light control, efficiency, uniformity, and visual comfort.

Sales Network

- Worldwide established distributors
- Direct sales offices in China, Switzerland and US
- R&D and operation centers in China, Germany, Switzerland, Singapore; Malaysia operation center being constructed

Your committed and reliable long-term partner in photonics components and solutions

Diode laser light source leader and beam shaping expert with strong IP position

One-stop-shop provider of micro-optics choosing from five process technologies best matching customer needs

Global photonics foundry that convert customers' ideas and designs into their own products and solutions

Total solution, versatile customization service and field service provider

Strong RDE capability, high volume production capacity and low-cost manufacturing

Financially healthy and strong financial backing from investors for long term growth

THANK YOU
