Focuslight Corporate Overview

© Focuslight Technologies Inc.

2026-11

Focuslight Overview

FOCUSLIGHT
Never stop exploring

- Founded in 2007 by Dr. Victor X. Liu, headquartered in Xi'an, China.
- A fast-growing company that develops and manufactures:
  - **Laser sources and materials** (Photon Generation)
  - **Optical components** (Photon Control)
  - **Photonics module and system solutions** (Application Solutions) focusing on **optical communication, consumer electronics, and pan-semiconductor applications**.
- A **global photonics foundry** offering process development and manufacturing services to the global photonics community.
- Publicly listed in the Shanghai Stock Exchange (Ticker Symbol: 688167).

Milestones

FOCUSLIGHT
Never stop exploring

2007

Founding of Focuslight

2018

Dongguan delivery and high-volume manufacturing center officially in operation

2021

Successful IPO at Shanghai Stock Market

2024

Acquisition of ams OSRAM's optical component assets;

Relaunch of Heptagon brand

2025

Hefei Base officially in operation

2026

Malaysia Base in construction

2024

Shaoguan Base officially in operation

2024

Acquisition of SUSS MicroOptics

2019

Global branding identity upgrade

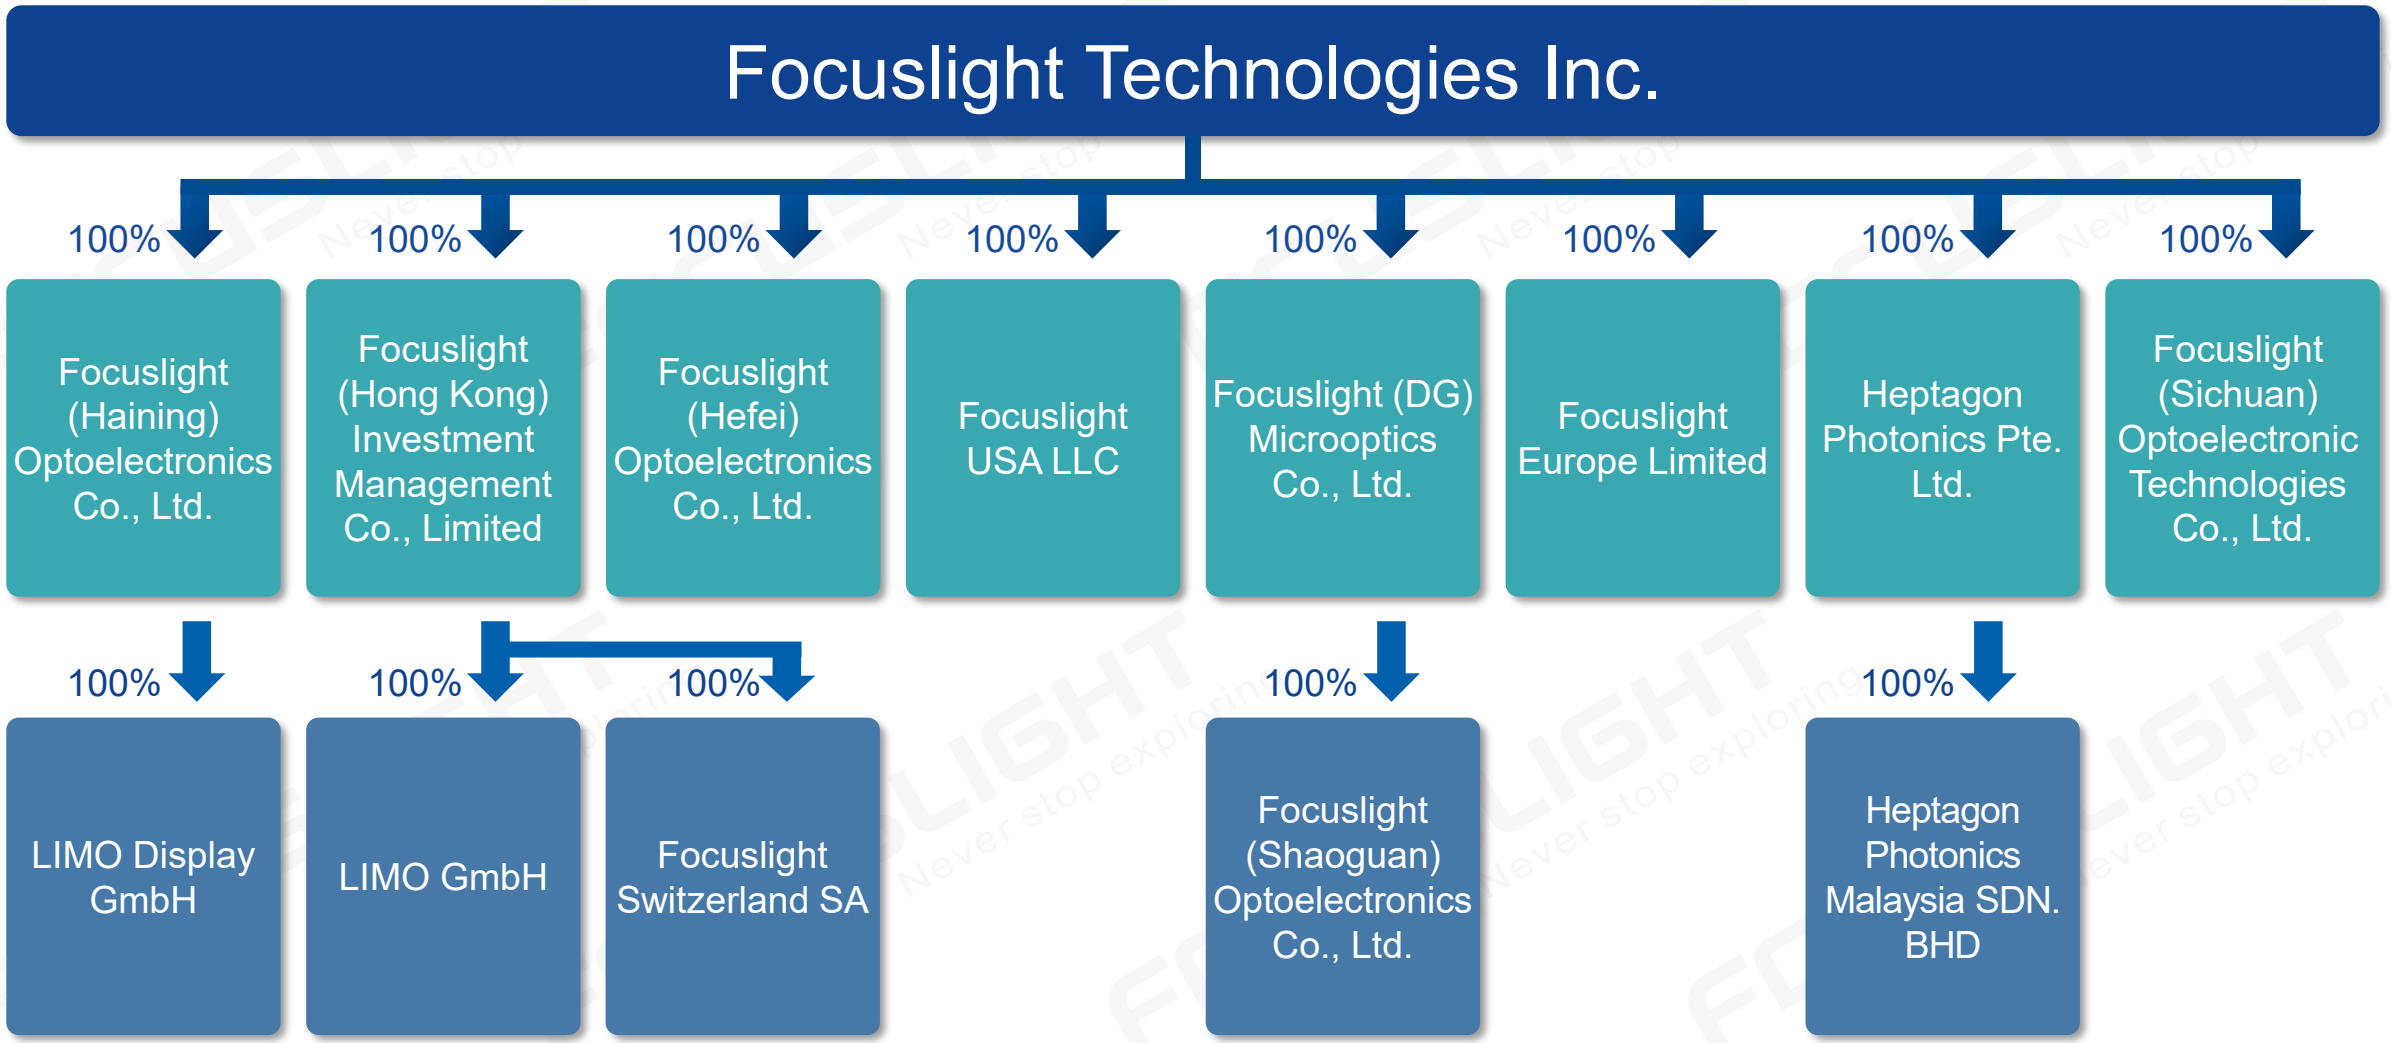

2017

Acquisition of LIMO;

Started providing photon control and photonics application solutions

Focuslight Corporate and Subsidiaries

Focuslight Global Operations System

FOCUSLIGHT
Never stop exploring

Switzerland

Germany

Dongguan, China

Shaoguan, China

Sichuan, China

Xi'an, China

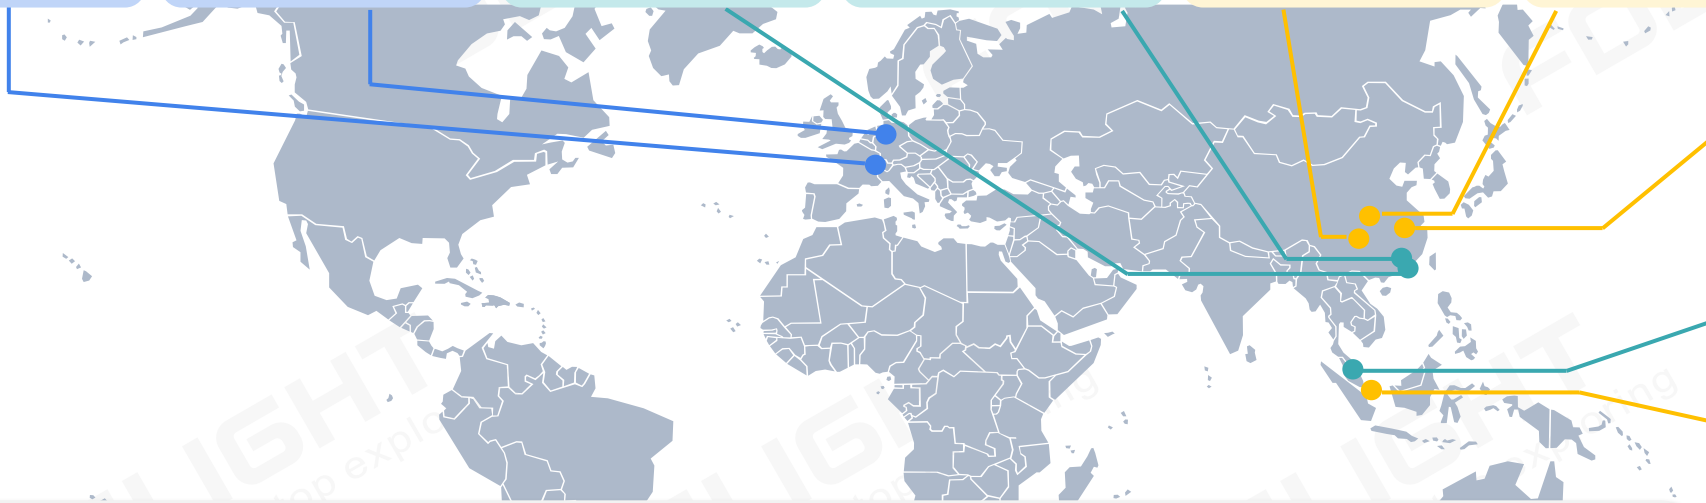

Hefei, China

Malaysia

Singapore

Fast Development Cycle: Europe/Asia co-innovation → Asia engineering → Asia mass production

Cost & Quality: Competitive production cost without compromising precision or reliability

Supply Chain Resilience: Multi-site operations reduce geopolitical and single-location risks

Customer Proximity: Localized execution speed across China, USA, Europe, and Southeast Asia

R&D, Innovation | *Engineering* | *Mass Production*

Corporate Management Team

FOCUSLIGHT
Never stop exploring

Dr. Xingsheng Liu (Victor)

Chairman, CEO

Research and management experience in the US, with 100+ publications, 300+ patents, 30+ invited papers internationally

Committee Member of SPIE and IEEE

CORNING COHERENT nLIGHT

Dr. Chung-En Zah

CTO

30+ years of research experience in the US, with 300+ publications, 50+ patents in optoelectronics and telecommunication

IEEE Fellow, OSA Fellow, 2x R&D 100 award winner

THORLABS CORNING Bellcore Bell Communications Research

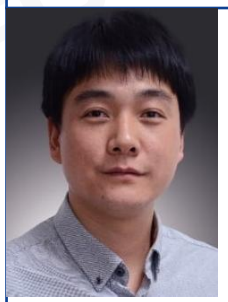

Mr. Sinclair Vass

Corporate SVP of International Sales & Business Development

35+ years experience in international photonics markets, having held technical, commercial and general management leadership roles at major multinational companies

Velodyne JDSU Lucent Technologies Bell Labs Innovations

Mr. Ye Dai (Robert)

Corporate VP of Global Sales

Excellent track record in worldwide sales, product line and business unit management leadership roles

20+ patents granted

IVO APPLIED MATERIALS

Mr. Guowei Zhu (Gavin)

Vice President of Global Operations

20+ years in international automotive companies, rich experience in IATF QMS and plant operations management by World Class Manufacturing (WCM) & Lean manufacturing

MAGNETI MARELLI BorgWarner GST SETON AUTOLEATHER

Mr. Lucas Zhang

Vice President of Global Operations

20 years of global supply chain management experience at multiple Fortune 500 companies, with strong expertise in in supply chain planning and management within the consumer electronics industry

HUAWEI LCFC Quanta Computer

Mr. Tan Chee Huo (Michael)

Corporate SVP of Business Process and IT

25+ years in IT leadership, specializes in digital business transformation, global project management, multicultural team leadership in fast-paced international industries, and strategic decision-making

NOKIA ThermoFisher SCIENTIFIC Tupperware EVIDENT

Dr. Hong Wang

Board Director, CFO

PhD in physics and Master in computer science. 20+ years in quantitative analytics, capital market risk modeling and architecting. Expert in building analytic infrastructure and system. Rich experience in multinational team management.

WELLS FARGO citi Sabre

Ms. Xuefeng Zhang (Jennifer)

Board Director, Board Secretary, Marketing Director

15+ years photonics industry international business experience, in-depth understanding and rich experience in sales, marketing and business development

RMD A Dynasil Company RAYSUNG

Corporate Management Team

FOCUSLIGHT
Never stop exploring

Mr. Qichuan Yu

Chief Product/Process Officer

Over 25 years of experience in wafer-level optics, optical sensor and camera packaging, SAW/BAW filter R&D, and NPD execution, with a strong focus on mastering, tooling, and wafer-level processes

ams OSRAM HEPTAGON EPCOS

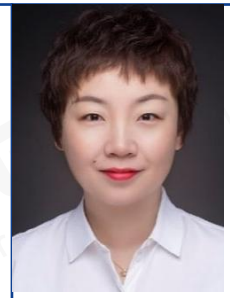

Dr. Tobias Senn

Corporate R&D Director

15+ years of experience in micro-optical component development for the consumer market. Expert in design for manufacturing and process development, with a strong focus on high-volume production and yield improvement

ams OSRAM NIL TECHNOLOGY HZB Helmholtz Zentrum Berlin

Ms. Yiping Ye (Alison)

Chief Governance and Administrative Officer

20+ years management experience and multi-field business practices, with in-depth understanding in LTC, IPD, intercultural cooperation, as well as in market development, project operation and business management

HUAWEI Hanergy 汉能

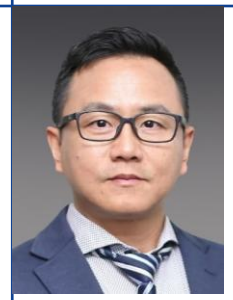

Mr. Dirk Walter Bogs

Corporate VP, President of Laser Optics BU

25+ years experience in ultra-precision tooling, optic manufacturing, engineering & project management, and operational management

Very deep knowledge of technology development and optimization

LIMO
A Focuslight Company

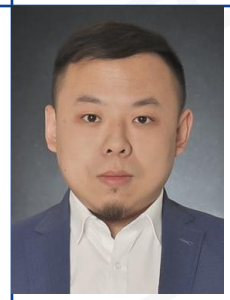

Mr. Yong Tian (York)

Corporate VP, VP of Laser Optics BU

20+ years of operation & R&D management, very deep knowledge with organic optical materials and optical coating technology, published SCI articles and owns patented technologies. Experienced in Lean Manufacturing & Industry 4.0

IBM ZEISS

Mr. Weiyi Gu

President of Laser Source and Applications BU

13 years experience in photonics R&D and product management, with rich track records of leaderships in developing and delivering system solutions for pan-semiconductor and industrial applications

FOCUSLIGHT
Never stop exploring

Mr. Vicknes Ratha Krishnan

VP of Laser Source and Applications BU

Proven business leader, 16+ years in program and product management within optoelectronics and semiconductors, working with multinational companies and top-tier customers.

ams OSRAM Inari Technology LUMILEDS

Mr. Hongyuan Liu (Tom)

President of Imprint Optics and Modules BU

20+ years in R&D and operations management, specializing in optical imaging and non-imaging system design, WLO process & integration, and optical component manufacturing. Proven track record in new product development and scaling high-volume production

ams OSRAM UNISTEEL flex

Ms. Qingchun Su (Sue)

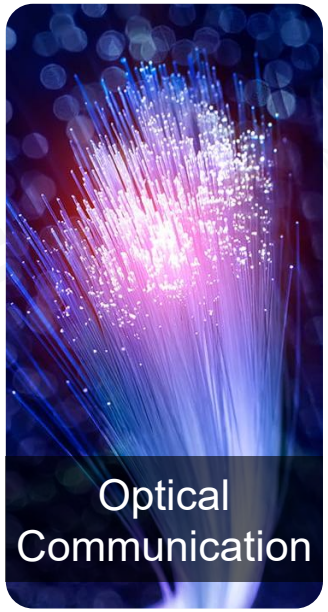

VP of Imprint Optics and Modules BU

~ 20 years global experience in consumer market business development, commercial operations, specializing in strategic planning and business breakthroughs

Industry Leader + Strong Financial Backing + Healthy Stable Company + Invest in the Future

Value Proposition

FOCUSLIGHT
Never stop exploring

Do what we do best

Offer the best value

Optimize to the extreme

Achieve the best performance / quality-to-price ratio

Commitment to Customers

- Lowest cost manufacturing for high volume products
- Willing to take technical risk, but request customer commit market share in return
- Willing to take investment risk in R&D and capital including M&A for customer but request customer commit market share in return
- Collaboration transparency, fast execution, IP protection and long-term partnership

What we don't do

Take high market risk

Be greedy

Be too aggressive

Compete against our customers

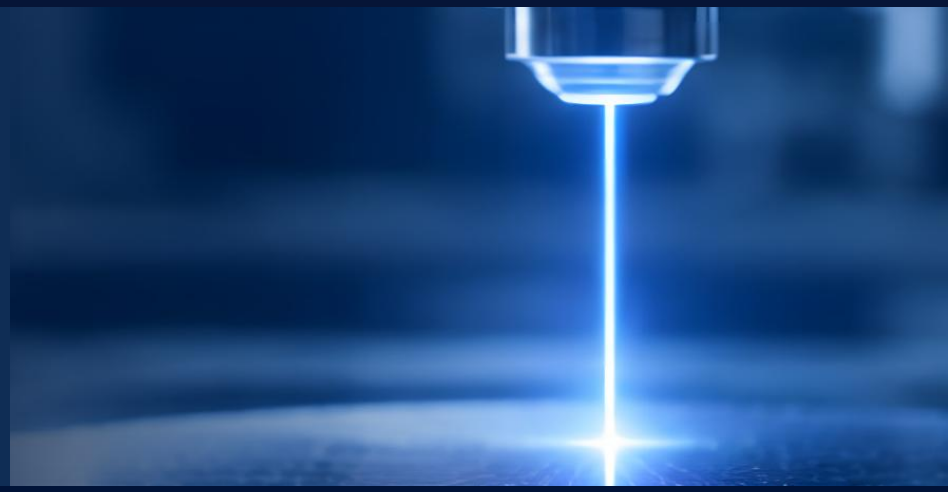

Our Purpose

To unlock the potential of photonics to enrich people's lives.

Our Mission

To innovate in photonics, create lasting value for our customers,
and advance the industries we serve.

Our Vision

To be the world's most trusted photonics company.

Our Core Values

FOCUSLIGHT
Never stop exploring

Quality

of company, services, products and people

Integrity

to customers, suppliers, employees, colleagues

Excellence

in innovation, manufacturing, continuous learning and improvement, products

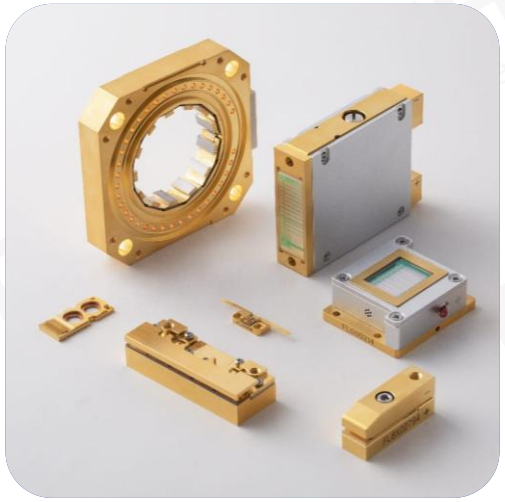

Courage

to accept challenges, accept mistakes, encourage people to speak up, willing to speak up, challenge ourselves

HEPTAGON

Product Business Under Focuslight Brand

What is a Product Business?

Focuslight takes ownership of the commercial product definition and roadmap, and commercializes the offering as a Focuslight product.

The product may be offered to multiple customers or applications.

Focuslight owns or holds the necessary rights to the relevant product IP and technology.

Focuslight brand is assigned to Product Business.

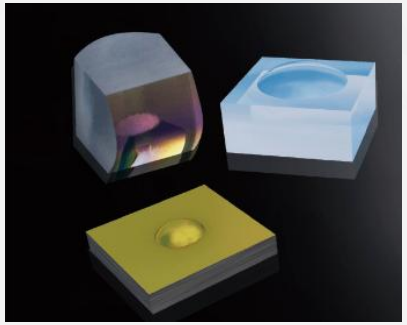

Products

Optical Components

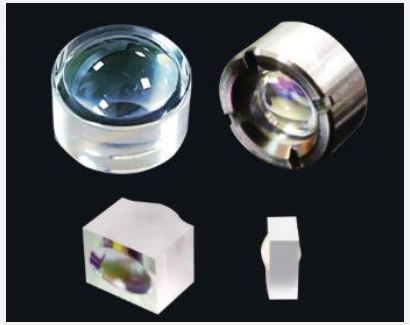

Single Lenses

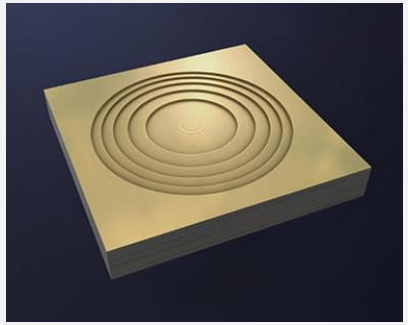

FACs

Fiber Couplers and Collimators

Focusing Lenses and Biconic Lenses

Collimating DOEs

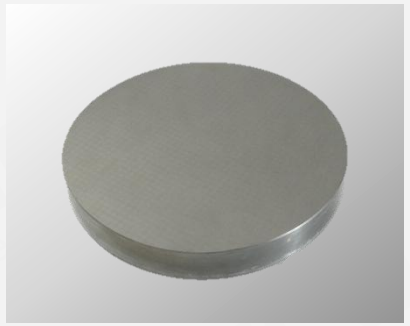

Convex/Concave Axicons

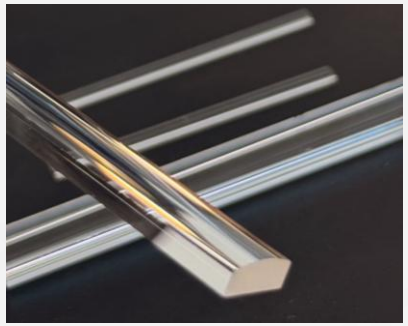

Waveplates

Beam Splitter Prisms and Corner Cubes

Large Plano Optics

Large Cylindrical Lenses

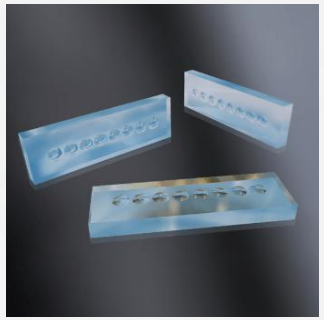

Large Spherical Lenses

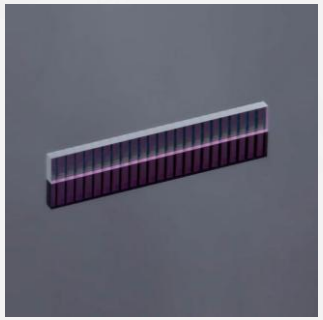

Products

Optical Components

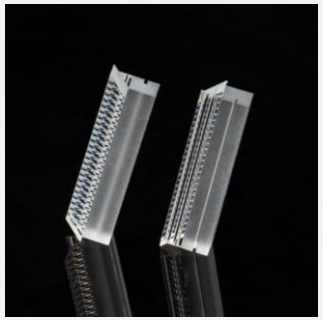

Linear Lens Arrays

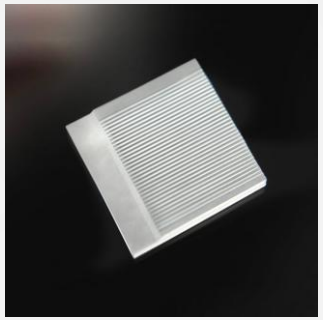

Fiber Coupling and Collimating Arrays

SAC Arrays

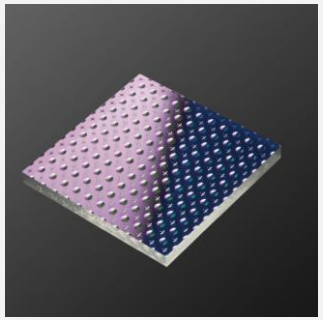

BTS

Engineered V-groove Arrays

Microprism Lens Arrays

N x N Large Lens Arrays

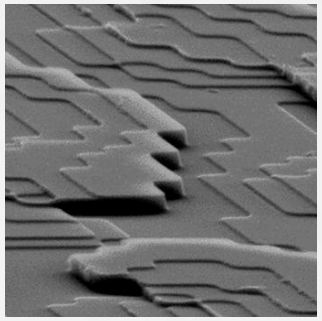

Area Lens Arrays

Homogenizers

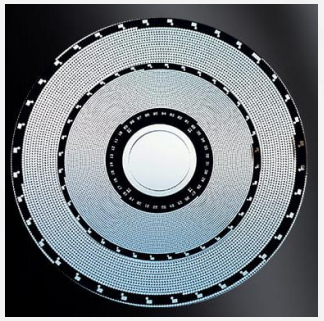

Diffusers

DOE Beam Splitters, Dot or Line Generators

Shack-Hartmann Arrays

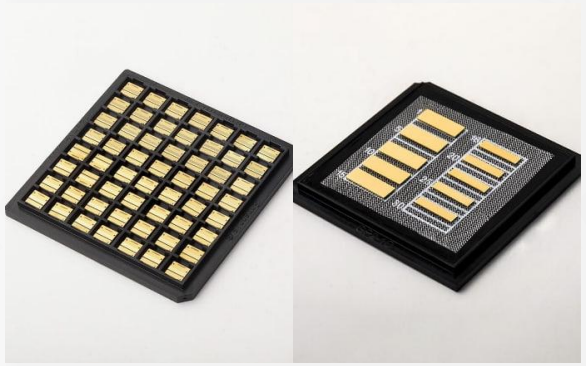

Pinhole Arrays

Products

FOCUSLIGHT
Never stop exploring

Laser Sources and Materials

Advanced Materials

- AuSn Pre-Deposited AlN Submounts
- AuSn Pre-Deposited CuW Submounts

Open-Package Diode Lasers

- Single Emitter Components
- Single Bar Components
- Micro-Channel Cooled Stacks
- Conduction Cooled Stacks
- Pumped Modules

Fiber-Coupled Diode Lasers

- Emitter-Based Modules
- Bar-Based Modules

Laser Source Modules

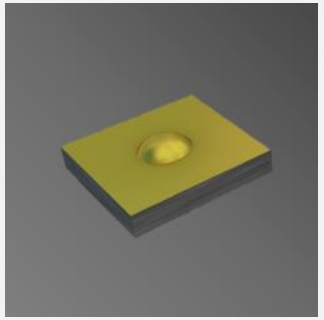

- Laser Hair Removal Treatment Modules
- Laser Skin Rejuvenation Modules

Products

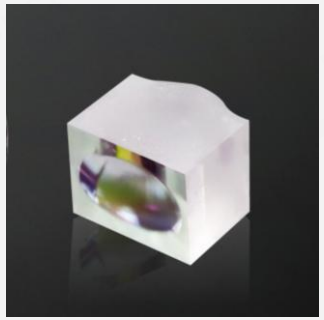

FOCUSLIGHT

Foundry Services Under Heptagon Brand

FOCUSLIGHT
Never stop exploring

What is Global Photonics Foundry Business (also referred to as Foundry Service)?

Customer

The customer takes ownership of the customer-specific product definition and roadmap.

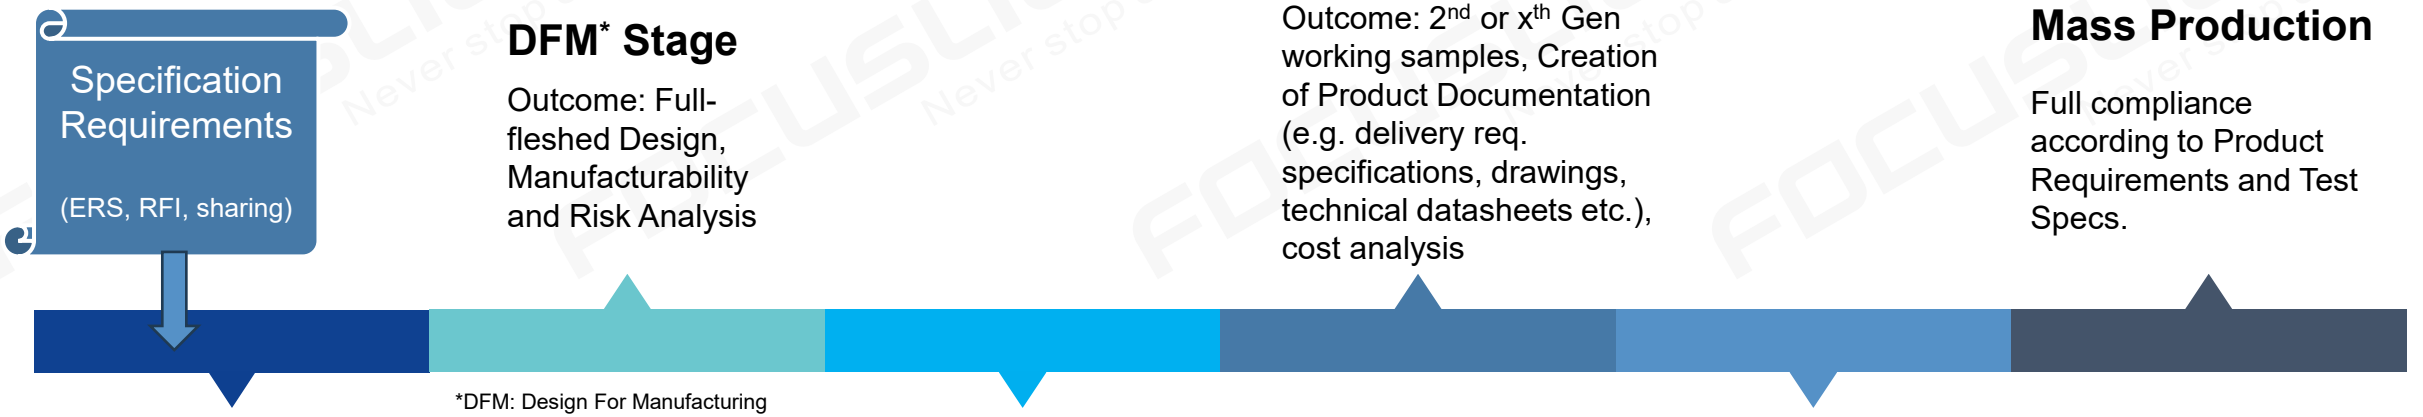

Focuslight

Focuslight provides capabilities such as process development, integration, industrialization, scale-up and manufacturing as services to the customer.

Heptagon brand is assigned to Global Photonics Foundry Business. HEPTAGON

From Concept to Mass Production

FOCUSLIGHT
Never stop exploring

Design Feasibility Study

Outcome: Concept & prelim. Design (fulfilling requirements, dimensions, est. cost),

DFM* Stage

Outcome: Full-fleshed Design, Manufacturability and Risk Analysis

*DFM: Design For Manufacturing

Design Verification / POC Stage

Outcome: 1st Gen Working Samples manufactured, testing data results for e.g. yield analysis

Product Validation & Qualification

Outcome: 2nd or xth Gen working samples, Creation of Product Documentation (e.g. delivery req. specifications, drawings, technical datasheets etc.), cost analysis

Ramp-Up

Mass Production

Full compliance according to Product Requirements and Test Specs.

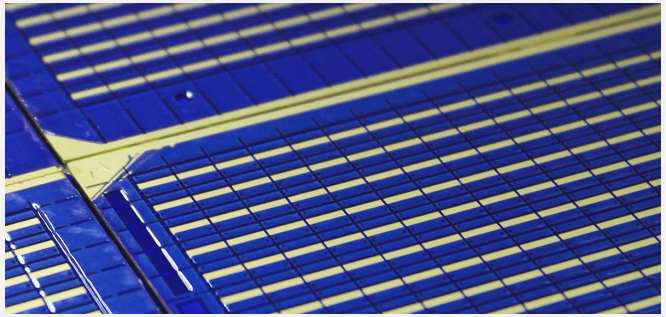

FOCUSLIGHT Never stop exploring

Typical Foundry Services

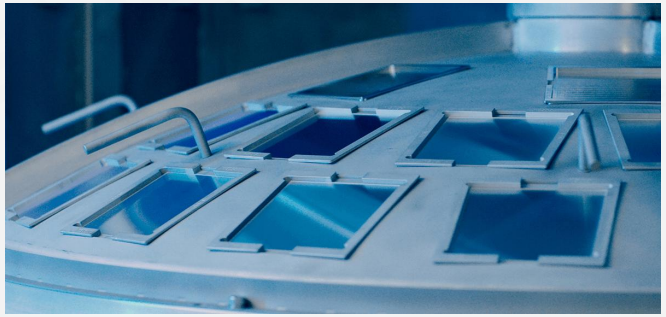

FOCUSLIGHT
Never stop exploring

Process Development, Integration, Industrialization, Scale-up and Manufacturing as Services

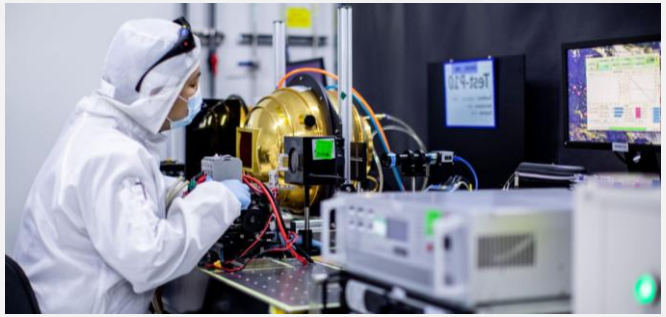

Thin Film Metallization

Optical Coating

Diode Laser Packaging

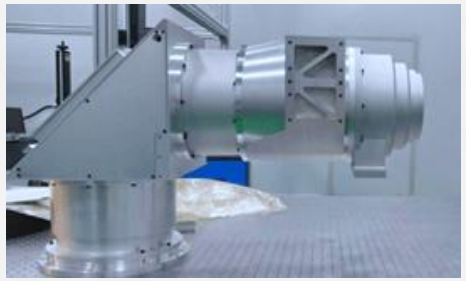

Semiconductor-Adjacent Optical Processing

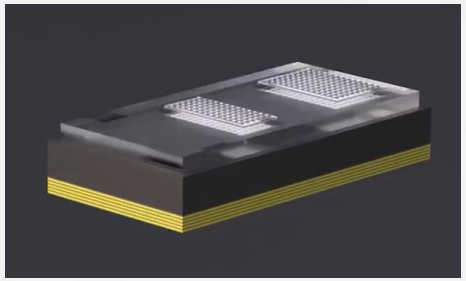

Patterning and optics imprinting on Wafers

Precision Optical Assembly

Integrated optical solutions

Sensor Module Packaging

From wafer-level optics to fully integrated optical sensor modules

End-to-end Technical Service

For pan-semiconductor processing solutions

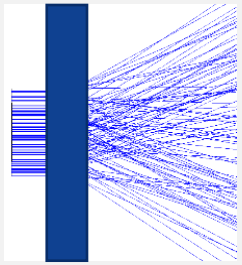

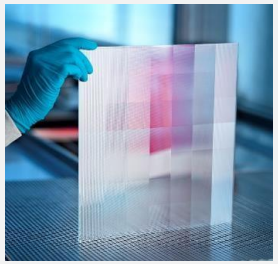

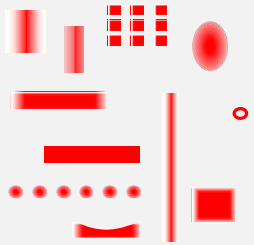

HEPTAGON

Core Competence

FOCUSLIGHT
Never stop exploring

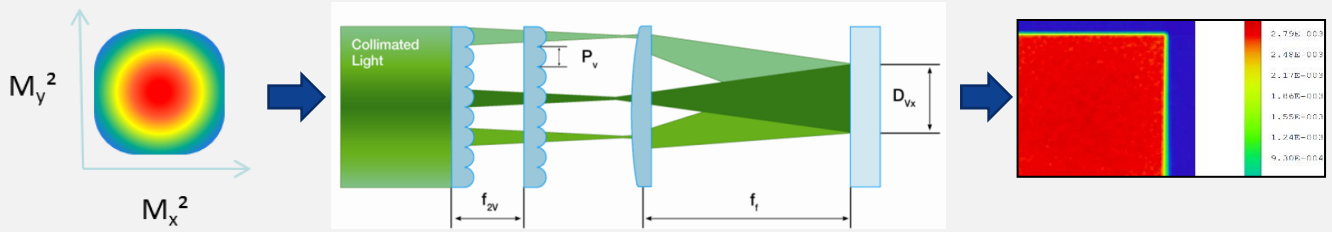

Beam Shaping – ***The Right Photon at the Right Place and Time!***

Micro Optics Design and Simulation

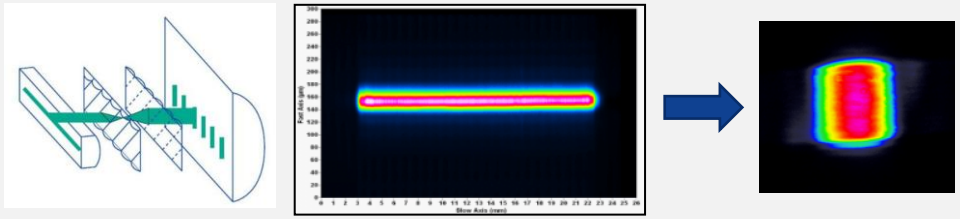

Acylindrical free-form micro-optics / arrays / diffusers / DOE splitters / beam shaping systems

Homogenization

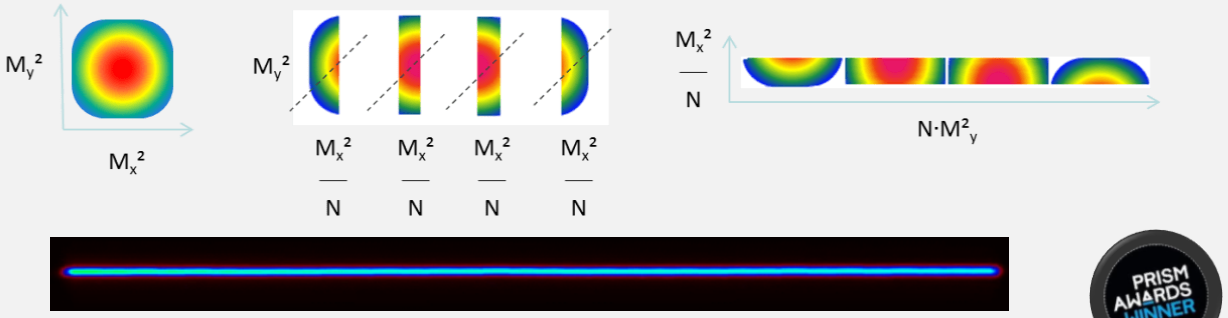

Uniform and homogeneous illumination in any desired shape

Beam Transformation

Asymmetrical → Symmetrical beam

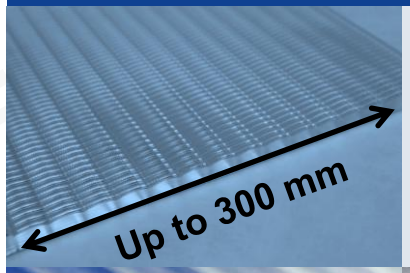

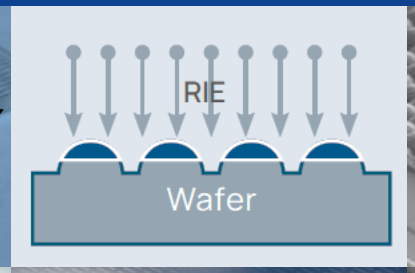

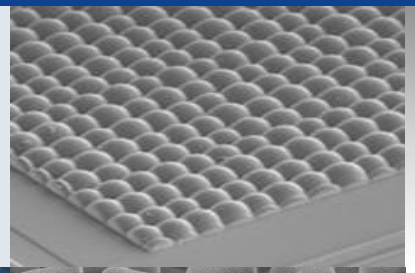

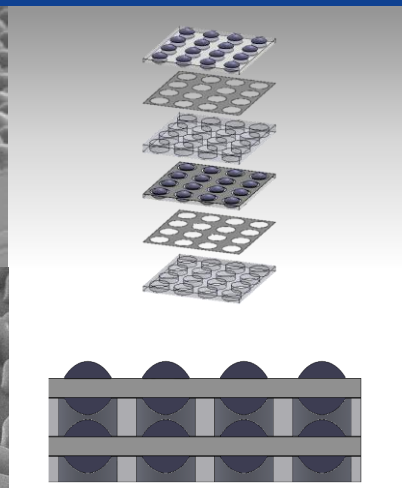

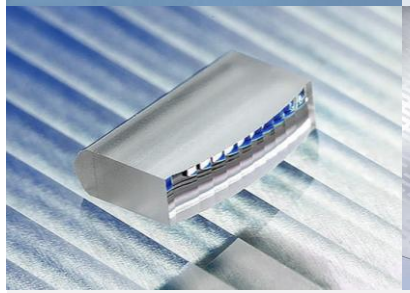

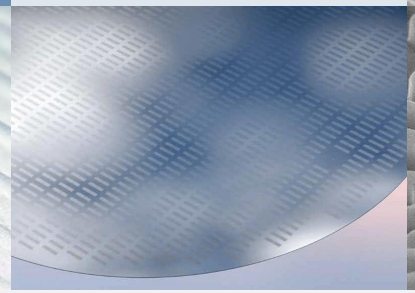

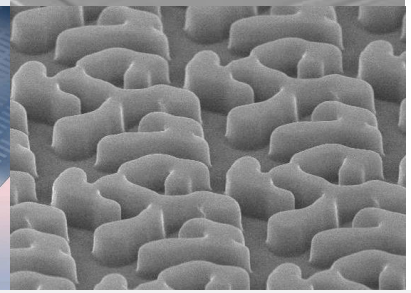

Symmetrical beam → High density line beam

Our UV-L750 System for Laser Lift-Off (LLO) was Prism Awards winner in 2018

Core Competence

FOCUSLIGHT

Optics Manufacturing

Wafer Level Simultaneous Structuring	Wafer Level Photolithography-RIE (reactive ion etching)	Wafer-Level Optics (WLO) Precision Imprinting	Wafer-Level Stacking (WLS)	Precision Glass Molding	Optical Grinding and Polishing
					
					
With inorganic materials: glass, fused silica, silicon, CaF_2		With polymer on glass		With moldable glass	With inorganic materials

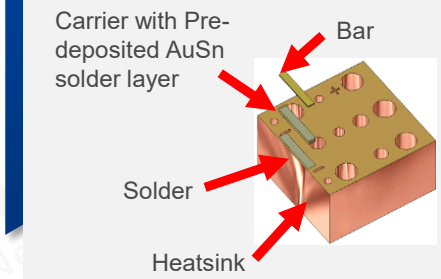

High LIDT Optical Coating: Anti-reflection, high-reflection, beam splitter, band filter, and various customization (UV, VIS, IR)

Core Competence

Diode Laser Packaging

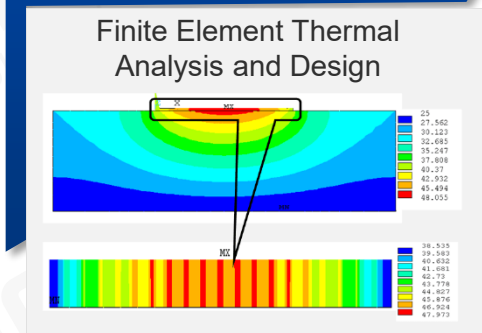

Eutectic Bonding

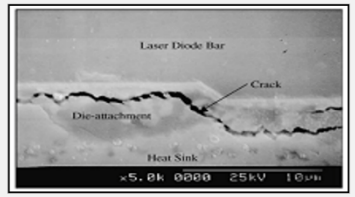

Significantly enhances thermal conductivity, reducing thermal stress, and thus improving the products' performance and lifetime

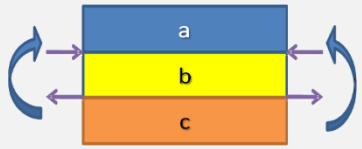

Thermal Management

Effectively improves the ability of heat dissipation to ensure a higher output power

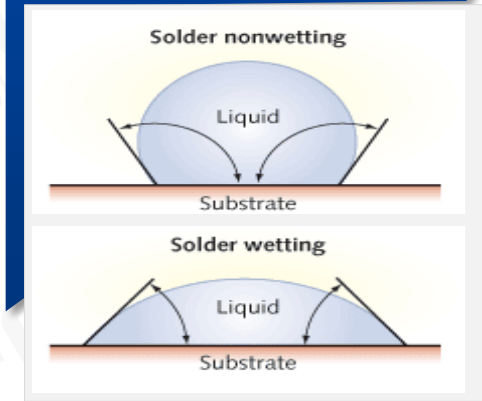

Thermal Stress Control

Lowers and homogenizes the thermal stress, and improve the device performance

Interface Materials and Surface Engineering

Greatly improves wettability and bonding strength of packaging materials, enhancing long-term reliability

Core Competence

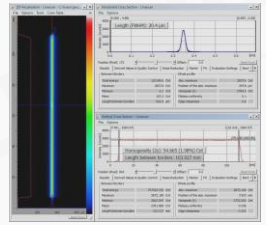

FOCUSLIGHT
Never stop exploring

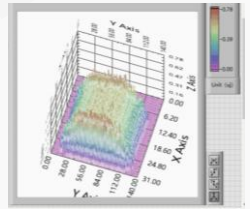

Test, Analysis and Diagnosis

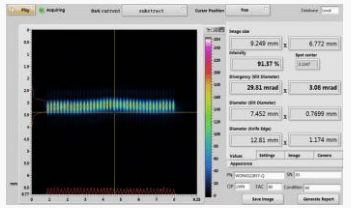

Test and Characterization of High-Power Diode Laser

A comprehensive physical diagnostic model allows full characterization of a set of key parameters, such as:

- LIV
- Spectrum
- Polarization
- Far-field / Near-field
- Spatial spectrum
- Spatial polarization
- Spatial beam profile
- Smile effect
- Lifetime

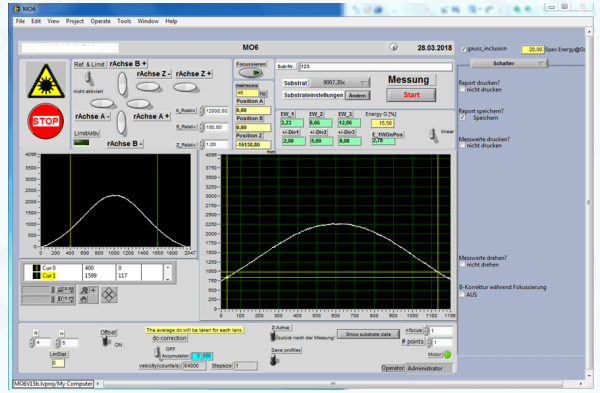

Metrology and Analysis of Optical Components

Wave optics models are used in conjunction with tactile surface measurements for precise analysis of optical functions such as:

- Focusing
- Collimation quality
- Beam uniformity

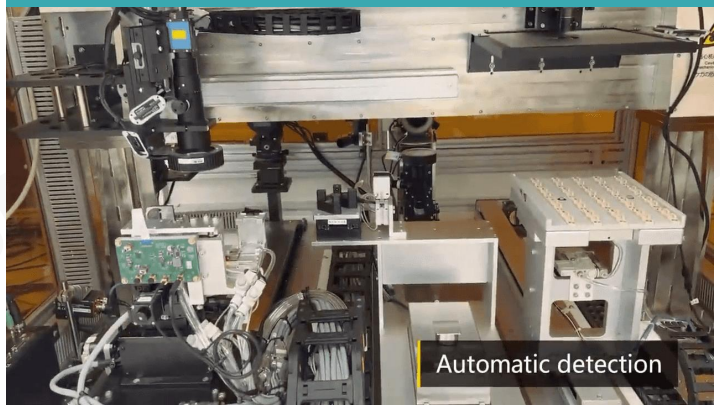

Core Competence

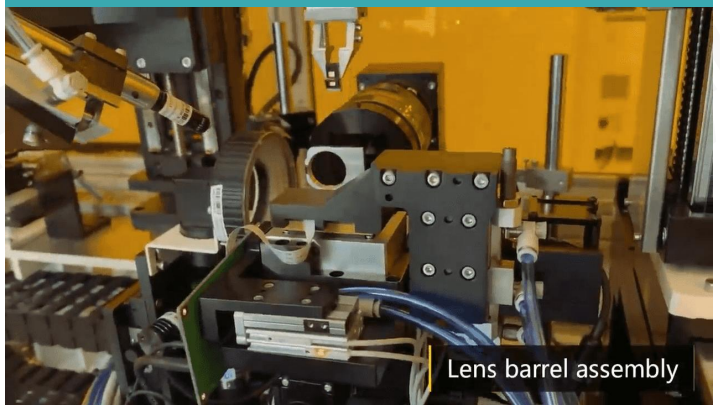

FOCUSLIGHT
Never stop exploring

Automation & Smart Manufacturing

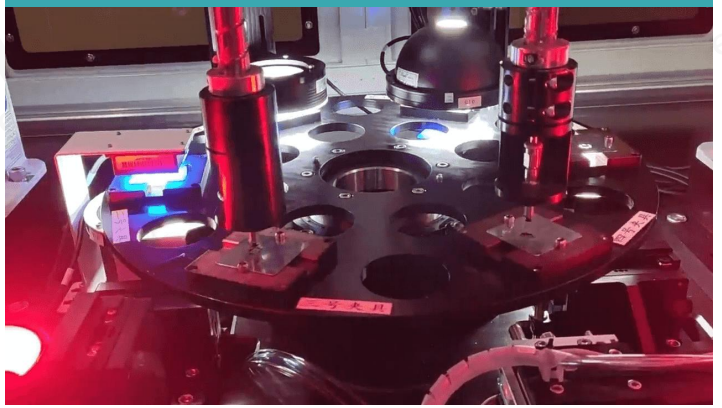

Automatic Optical Alignment

Automatic Assembly

Automated Optical Inspection

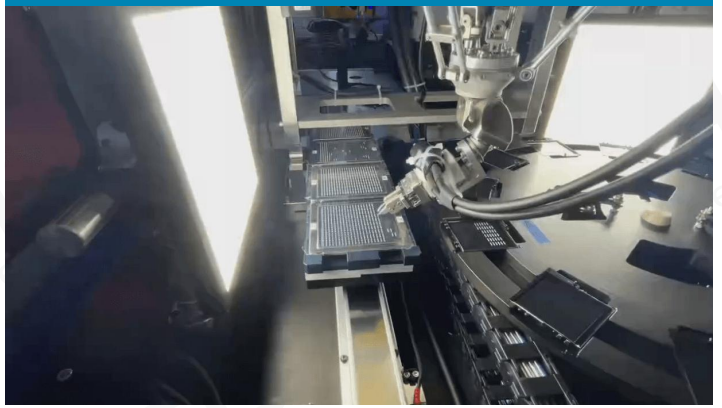

Laser Optics Production Line

Laser Module Production Line

Big Data Powered Production

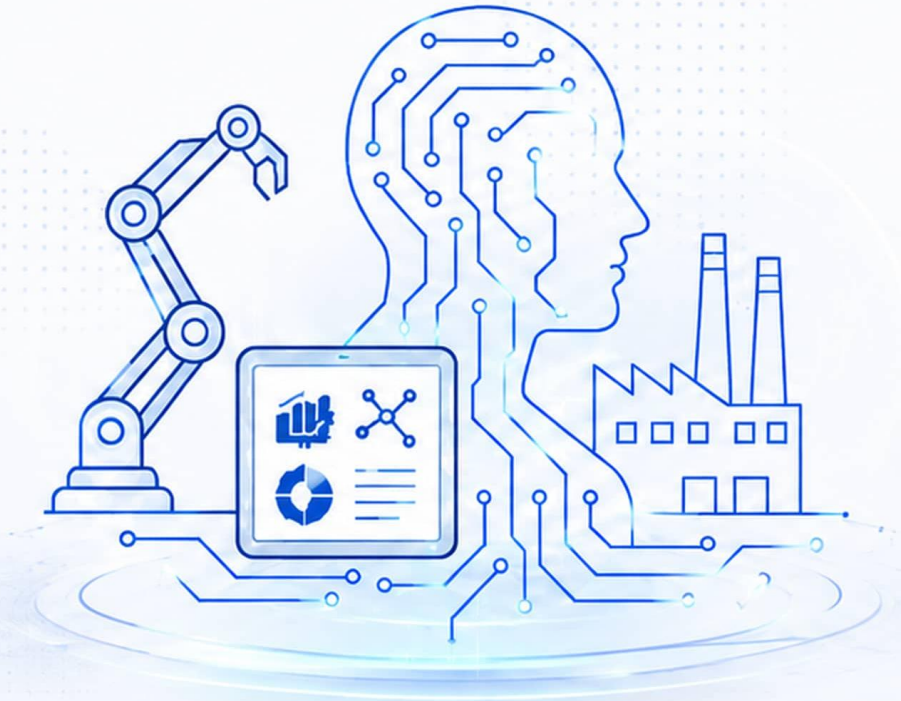

>60% equipment used in manufacturing are developed in-house by Focuslight

Core Competence

FOCUSLIGHT
Never stop exploring

Automation & Smart Manufacturing

Equipment Interconnection

MES

- Improved efficiency
- Big data enhances quality through visibility

Big Data Boosts Decision

Testing

- AA (Active alignment)
- PA (Passive alignment)

Automation

- AOI (Automated Optical Inspection)
- P&P (Pick & Place)
- CD (Collaborative Development)

Higher Productivity
Significant improvement in output and labor efficiency

Consistent Quality
Stable processes and visibility ensure high product consistency

Manufacturing Flexibility
Rapid changeover and scalable capacity to meet diverse customer needs

Strong Foundation
Proven platforms and data-driven operations for long-term growth

Driving productivity, quality and flexibility through in-house innovation and continuous improvement.

A Unified Quality Management System

FOCUSLIGHT
Never stop exploring

Governance Framework That Drives Enterprise-Wide Quality Excellence

- ISO9001 Certified Quality Management System (QMS)
- ISO14001 Certified Environmental Management System (EMS)
- IATF16949 Certified Automotive Quality Management System
- ISO45001 Certified Occupational Health and Safety Management System
- Failure Mode and Effect Analysis (FMEA)
- Statistical Process Control (SPC)
- Production Traceability Database
- Control Plan (CP)

Quality Assurance System

FOCUSLIGHT
Never stop exploring

Ensuring Product Reliability Through Rigorous Controls and Verification

Built-in Quality to Meet Customer's Needs

Assurance of Design Quality	Design of the Optimal Design Quality to Meet Customer Needs	Assurance of Manufacturing Quality	Built-in Optimal Design Quality	Assurance of Service Quality

NPI / APQP | Mass Production | RMA / Warranty

- Planning
- Research & Development

Diode Lasers

Packaging & Assembling

Optical Assembling

Testing & Measurement

Quality Inspection

Burn-in & Lifetime Test

Annual Manufacturing Capacity: > 500K diode lasers
Annual Burn-in Capacity: > 600K diode lasers

Six Pillars of Global Supply Chain Resilience

FOCUSLIGHT
Never stop exploring

01 Global Manufacturing Network

- Global manufacturing footprint across Asia and Europe
- Regional capacity flexibility & load balancing
- Cross-site production transfer capability
- Local customer support & fast execution
- In-house manufacturing across key technologies

02 Multi-Source Strategy

- Multi-qualified suppliers for critical materials
- Global supplier sourcing & qualification
- Supply risk diversification across regions
- Qualified alternate supplier readiness
- Strategic supplier partnerships

03 Supplier Excellence Management

- Supplier Quality Management System
- Risk-based supplier audits
- Supplier performance management
- Supplier capability development
- Continuous improvement program

04 Strategic Inventory & Demand Planning

- Integrated demand & supply planning
- Strategic inventory for critical materials
- Long lead-time material management
- Customer forecast collaboration
- Inventory optimization

05 Digital Supply Chain

- End-to-end planning visibility
- Global inventory visibility & tracking
- Real-time demand-supply synchronization
- Digital collaboration platform with suppliers
- Predictive analytics & risk early warning

06 Business Continuity Management

- Enterprise supply chain risk management
- Business continuity & contingency planning
- Critical product recovery strategy
- Global crisis response coordination
- Supply disruption simulation & preparedness

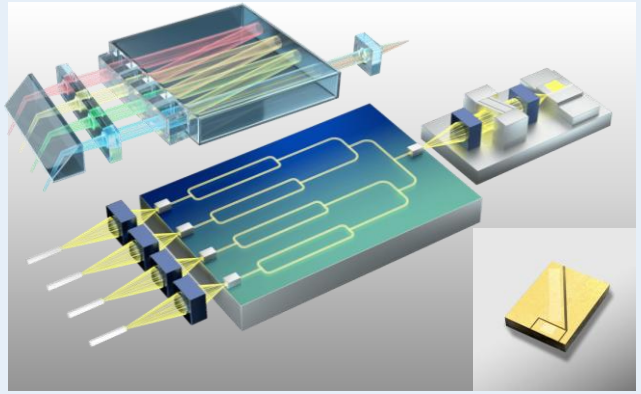

Building a resilient, flexible and sustainable global supply network

Typical Applications

Optical Communications

“Standard” Microlenses, Submounts

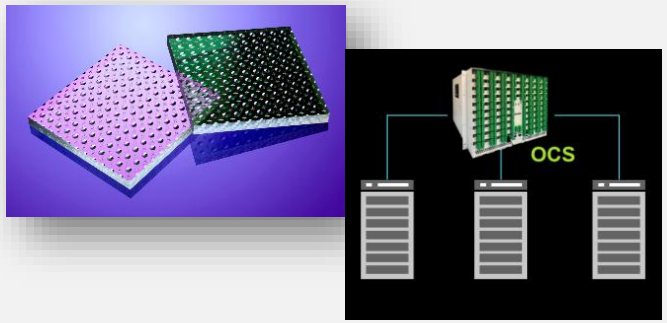

(For Pluggable Transceiver)

- High-volume, fast-moving, cost-sensitive
- Mature ecosystem, stable customer base

Special Microlenses

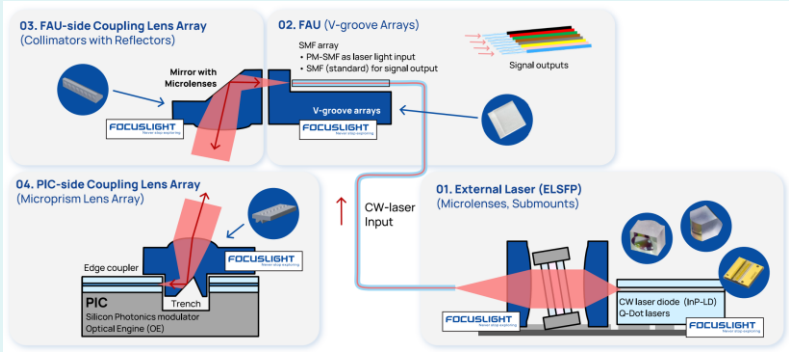

(For OCS, telecom…)

- Increasing demand due to AI/ML datacenters
- Requires customization and co-design

CPO-Specific Products

(MPLA, VGA, coupling optics/submounts for ELSFP, assembly & packaging service…)

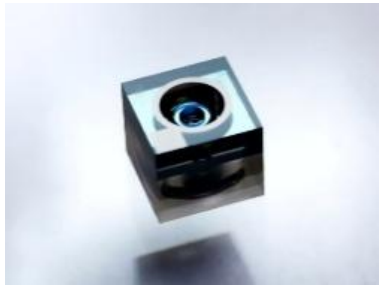

- Strategic, high entry barrier
- Strong roadmap alignment required
- Long development cycles but high lifetime value

Typical Applications

FOCUSLIGHT
Never stop exploring

Consumer Electronics

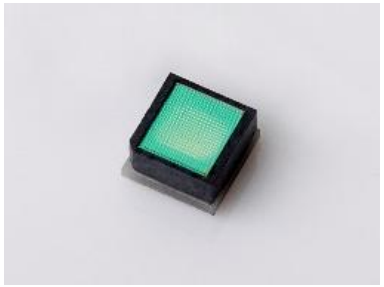

Imprinted Optics and Modules

Core Technology Engine

- WLO lens and stacking, micro-camera assembly
- WLO diffuser
- MLA headlamps
- MLA light carpet

Sensor Module Packaging

Consumer Electronics Platform

- Ambient light sensor module
- Future-ready, reflow-capable miniaturization
- Unique value prop: Solve CE customer painpoints for behind-screen ALS

Semiconductor-Adjacent Optical Processing

Emerging Growth Engine

- Patterned wafer supply (internal + external) with different substrate and pattern material
- Free-form micro-structured optics imprinting on customer semi-finished wafer

Typical Applications

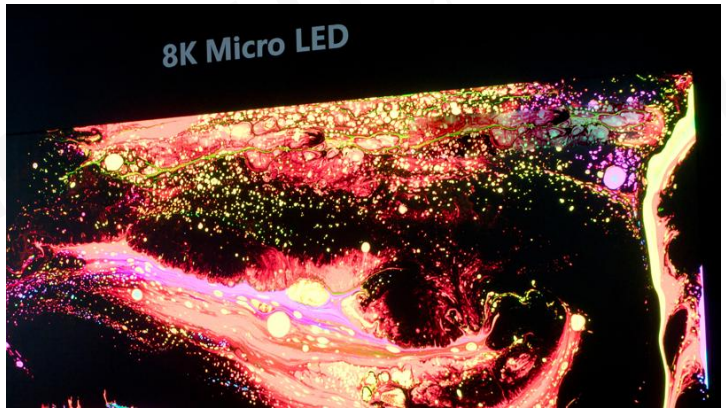

FOCUSLIGHT
Never stop exploring

Pan-Semiconductor Processing

Electronic Integrated Circuits (EIC)

- Annealing for logic chips, memory chips and power devices (IGBT backside and SiC)
- 2.5D / 3D advanced packaging
- Optics for front-end inspection
- Optics and components for laser direct-write lithography

Mini / Micro LED

- Laser mass transfer
- Large-area laser soldering
- Point-to-point laser chip repair

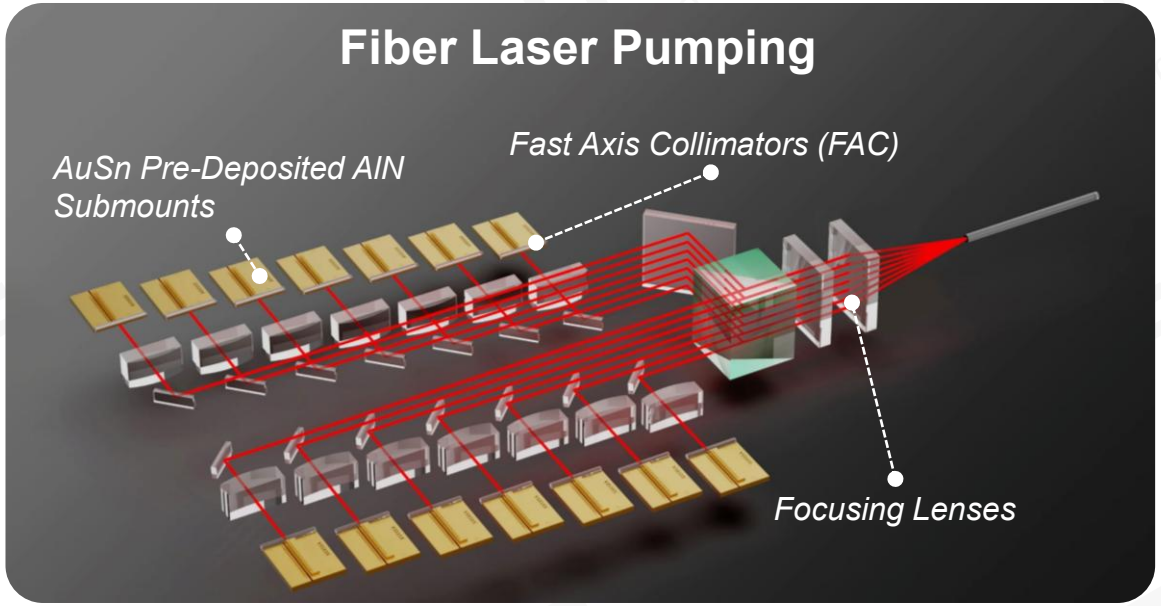

Flat Panel Displays (FPD)

- Laser annealing optical systems
- Laser lift-off (LLO) optical systems
- Large-area windows and lenses

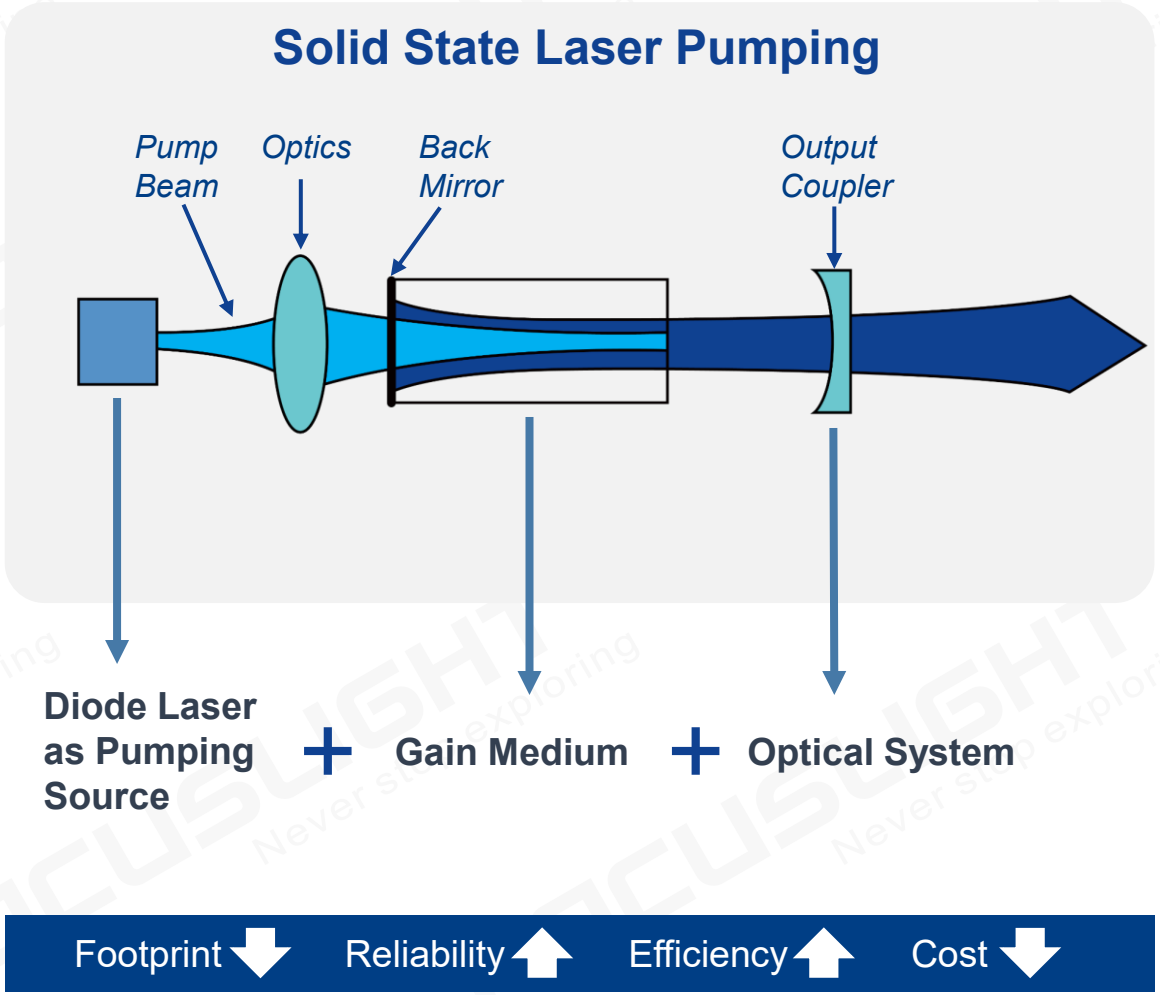

Typical Applications

FOCUSLIGHT
Never stop exploring

Industrial

- **AuSn pre-deposited submounts** – stable and reliable thanks to the high thermal conductivity and suitable thermal expansion coefficient;
- **Fast axis collimators (FAC)** – fundamental and efficient solutions for shaping the beam emitted by the pumping sources;
- **Focusing lenses** – coupling the collimated laser beam precisely into the output fiber;

Typical Applications

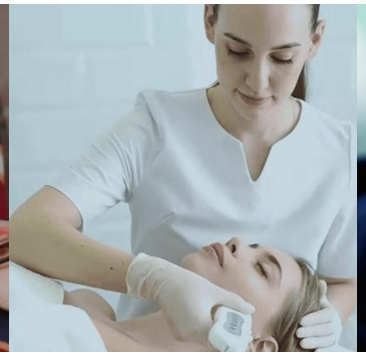

Medical and Health

Hair Removal

Body Sculpting

Skin Rejuvenation

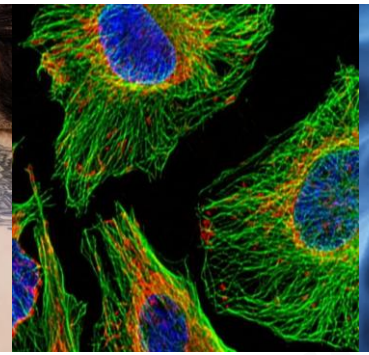

Ophthalmology

3D Interoral Scanning

Dermatology

Confocal Microscopy

Endoscopy

Sensing

Laser Surgery

- Optical Components; Laser Components
- Optical Solutions; Laser+Optics Assembly; Application Handpiece
- Manufacturing Services
- *Focuslight does not produce medical or health equipment*

Typical Applications

FOCUSLIGHT
Never stop exploring

Automotive

LiDAR

Driver Monitoring System

Smart Headlight

AR HUD

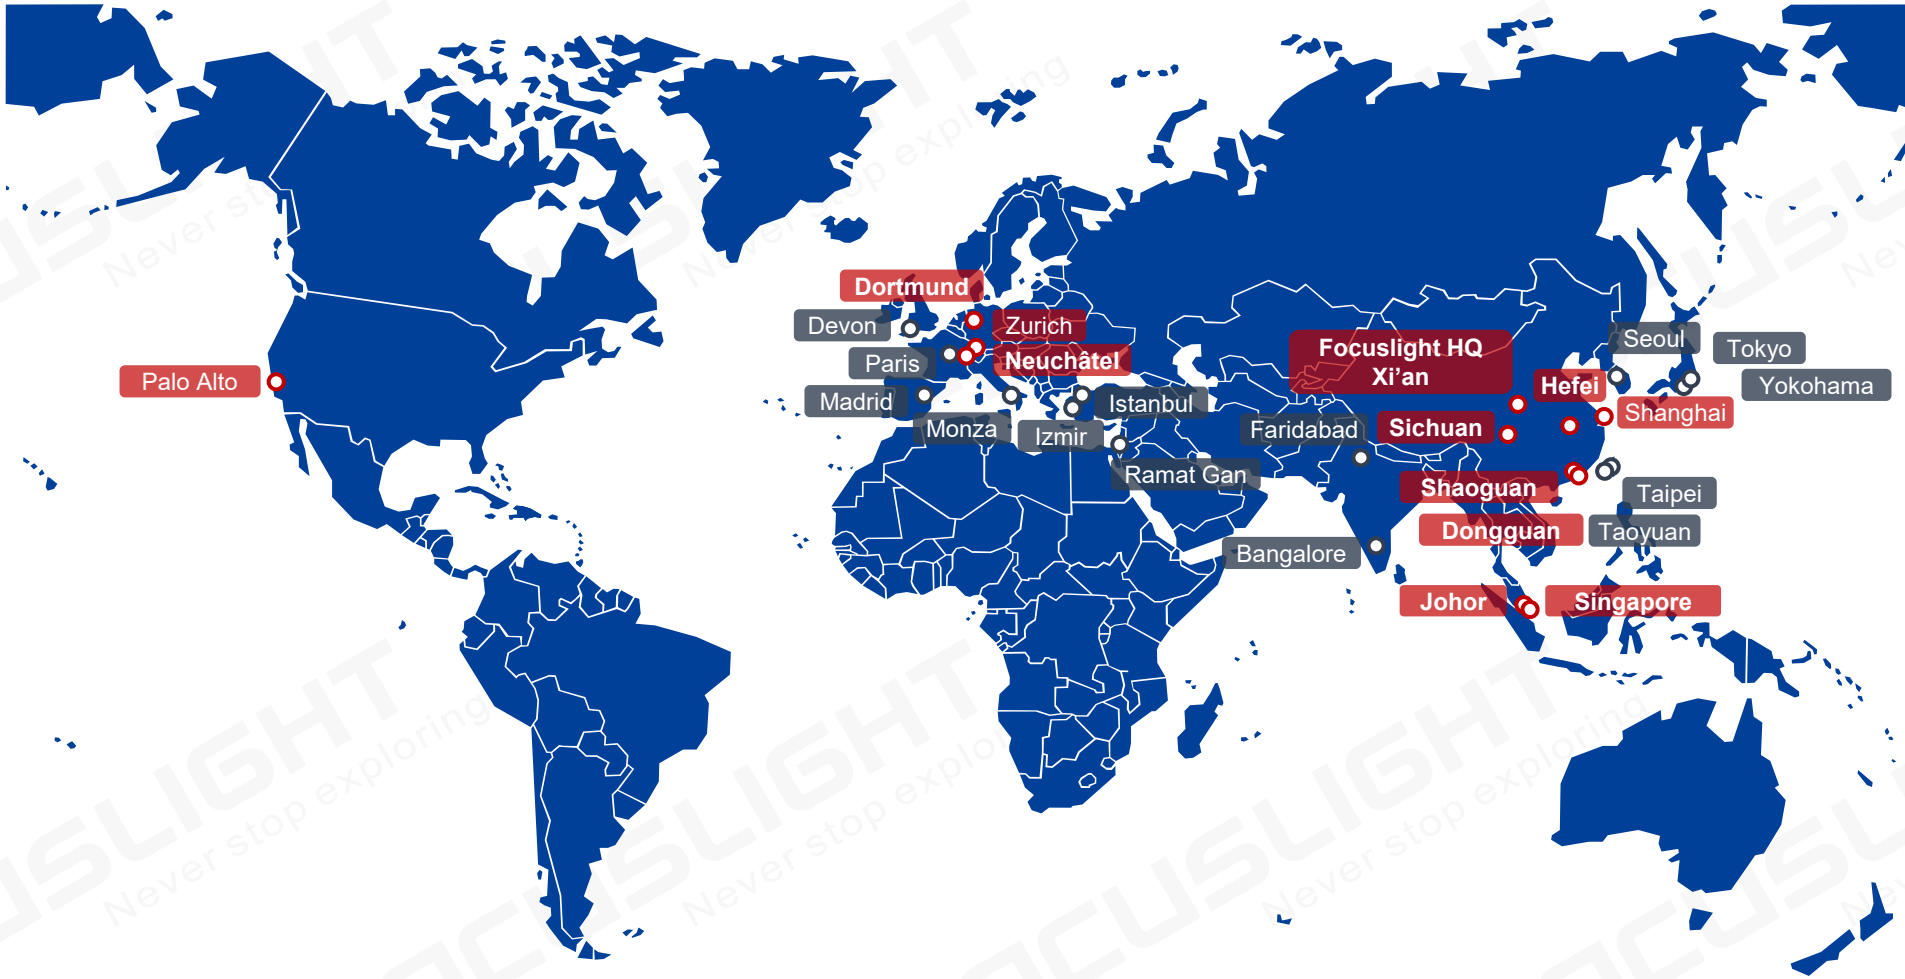

Projected Lighting

- Optical Components and Assemblies
- Laser Modules
- *Focuslight does not produce LiDAR / Lighting full system*

Sales Network

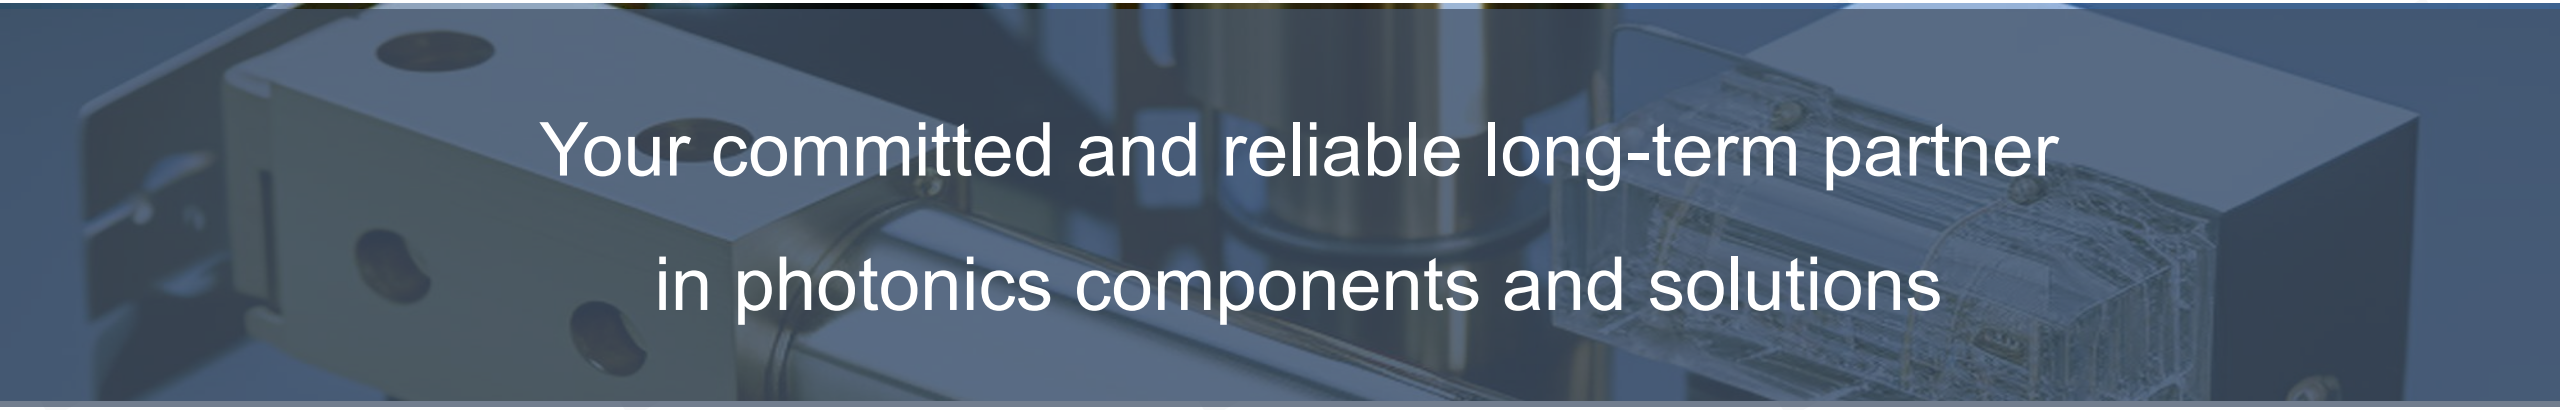

FOCUSLIGHT
Never stop exploring

- Worldwide established distributors
- Direct sales offices in China, Switzerland and US
- R&D and operation centers in China, Germany, Switzerland, Singapore; Malaysia operation center being constructed

Summary

FOCUSLIGHT
Never stop exploring

Your committed and reliable long-term partner in photonics components and solutions

- Diode laser light source leader and beam shaping expert with strong IP position
- One-stop-shop of optical components choosing from multiple process technologies best matching customer needs
- Global photonics foundry that convert customers' ideas and designs into their own products and solutions
- Total solution, versatile customization service and field service provider
- Strong RDE capability, high volume production capacity and low-cost manufacturing
- Financially healthy and strong financial backing from investors for long term growth

THANK YOU
