

Focuslight Shaoguan Base Has Passed the IATF 16949 Audit

Nov 13th, 2024

On November 13th, 2024, Focuslight Shaoguan Base successfully completed the one-week IATF16949 on-site audit conducted by the certification body TÜV SÜD. According to the requirements of IATF process, the relevant registration certificate will be issued following TÜV SÜD headquarters' approval, and the official certificate is anticipated to be released in 120 days.

Focuslight cooperates with global partners in the fields of automotive headlight, automotive projected lighting, automotive LiDAR, ARHUD, and driver monitoring systems, and provides customers with laser optics components, modules, assemblies, and sub-systems. Focuslight strives to increase its market share and competitiveness, and enhance and expand its research and development, process technology capabilities, manufacturing capabilities and mass manufacturing capacity for related micro-optics components. As a crucial part of Focuslight's global business strategy, the successful IATF certification of the Focuslight's headquarter, Xi'an, Dongguan base, and the Shaoguan base, has taken the company's business to a higher level.

IATF 16949 is a global quality management system standard for the automotive industry that incorporates ISO 9001 with additional automotive requirements. The first edition was published by the International Automotive Task Force (IATF) in 1999, aiming to coordinate different assessment and certification systems in the global automotive industry supply chain. It is the basic requirement for the supplier quality system in the modern auto parts supply chain. Focuslight's headquarter, Xi'an, and it's Dongguan base already obtained the IATF 16949 certificates certified by TÜV SÜD in July 2020 and July 2023, respectively.

In November 2024, Focuslight Shaoguan Base accepted the certification audit conducted by TÜV SÜD in accordance with the IATF16949 quality management system. Under the management and guidance of the head office's quality system and years of experience in mass production, Focuslight Shaoguan Base successfully passed the audit. As a result, Focuslight's capability to supply micro-optics products to customers in the automotive industry is significantly strengthened.

Passing the IATF 16949 quality system audit means that Focuslight's quality management system is in line with international standards, and the delivery and quality of its

products are guaranteed in the long term. This achievement further consolidates Focuslight's position as an industry-recognized and highly trusted global provider of photonic application solutions. Focuslight will adhere to the corporate values of "Quality, Integrity, Excellence, and Courage", and strive to be the globally trusted photonics solution provider through quality products and services.

About Focuslight

Founded in 2007 and headquartered in Xi'an, China, Focuslight Technologies Inc. is a fast-growing public company (Shanghai: 688167) that specializes in developing and manufacturing high-power diode laser components and materials, laser optics, as well as photonics module and system solutions focusing on optical communication, automotive, pan-semiconductor, and medical and health applications. Focuslight has expanded its global footprint through strategic acquisitions including LIMO GmbH in 2017 and SUSS MicroOptics SA in 2024 (now as Focuslight Switzerland SA). With the acquisition of assets from ams OSRAM in 2024, Focuslight extends its business to be a global photonics foundry by providing global photonics industry process development and manufacturing service under the brand of Heptagon.
